ABOUT ME

Results-driven Software Developer with 4 years of experience building high-performance web applications. Expert in React and TypeScript, with an instinct for solving complex technical roadblocks and "finding the way" through architectural challenges. Proven track record leading the development of secure eKYC and Biometric solutions, bridging robust backend logic (Python/Flask) with seamless, polished user experiences. Passionate about craftsmanship, UI/UX detail, and delivering scalable code.

EXPERIENCE

Noa Export Bogotá, COL (Remote)
Project Lead & Software Developer 09/2024 – 10/2026

- **Product Evolution:** Led the migration and structural scaling of a core eKYC platform, evolving the product from a Beta version to a production-ready system with a significant increase in data accuracy.
- **Biometric Integration:** Engineered the Frontend/Backend logic for complex identity verification flows, integrating Facial Recognition, Anti-spoofing, and Live Selfie detection to ensure high security without compromising UX.
- **Advanced Data Capture:** Implemented OCR and Object Detection capabilities to automatically identify document types and countries, reducing manual user entry by 70%.
- **Peripheral Connectivity:** Developed custom integrations for Barcode Readers and MRZ Scanners, optimizing real-time data extraction from physical identity documents.
- **Performance Optimization:** Collaborated with QA to identify and resolve critical performance bottlenecks, ensuring smooth rendering of high-resolution camera feeds on low-end devices.

Pki Services Bogotá, COL (Remote)
Full-stack Developer (Frontend Focus) 07/2022 – 08/2024

- **Career Growth:** Fast-tracked from Junior Developer to Project Lead within 12 months, taking full ownership of the eKYC project's frontend architecture.
- **Modern Stack Migration:** Architected the eKYC onboarding flow using React and TypeScript, moving away from legacy patterns to a component-based, type-safe architecture.
- **Backend API Design:** Built and maintained secure RESTful APIs with Python and Flask, ensuring seamless communication between the frontend and the identity validation engines.
- **Document Digitization:** Developed the GUI and business logic for Electronic PDF Signatures, streamlining legal documentation processes for hundreds of users.
- **Legacy Support:** Maintained and debugged large-scale Angular systems, ensuring 99% uptime while migrating core features to modern React-based micro-frontends.

EDUCATION

IUTV (INSTITUTO UNIVERSITARIO DE TECNOLOGÍA VENEZUELA) Maturín, Monagas
Associate degree in informatics 11/2023

SKILLS & INTERESTS

Technical: JavaScript, TypeScript, React.js, HTML, CSS, Tailwind, Git, Python, Flask, SQL, MySQL/MariaDB, REST APIs, Docker, AI Agents.

Language: Spanish (native), English (fluent).
